PREMIUM QUALITY CUTTING TOOLS

1. HSS DRILL BITS

High precision drilling solutions for industrial applications.

- Jobber Drills
- Stub Drills
- Long Series Drills
- Taper Shank Drills

2. HSS TAPS

Reliable threading tools manufactured to ISO & DIN standards.

- Hand Taps
- Machine Taps
- Spiral Point Taps
- Edge Platinum Cut Taps

3. SOLID CARBIDE END MILLS

High-performance milling cutters for CNC machining and precision cutting applications.

- 2 Flute End Mills
- 4 Flute End Mills
- Ball Nose End Mills
- Roughing End Mills

4. ANNULAR CUTTERS

Efficient hole cutting solutions for fabrication and heavy engineering industries.

- HSS Annular Cutters
- TCT Annular Cutters

5. TUNGSTEN CARBIDE ROTARY BURRS

Precision deburring and shaping tools suitable for die grinding and metal finishing operations.

- Cylindrical Burrs
- Ball Nose Burrs
- Tree Shape Burrs
- Cone Shape Burrs

WHY MIRANDA TOOLS?

- ✓ Trusted Brand Since 1945
- ✓ ISO & DIN Standard Products
- ✓ High Durability & Accuracy
- ✓ Ideal for Automotive, Aerospace & General Engineering Industries
- ✓ Manufactured under Dormer Pramet Group

AUTHORIZED SUPPLIER OF

- ✂ Cutting Tools
- 🔧 Air Tools
- 📏 Measuring Instruments
- 🛢 Lubrication Equipment
- 🚛 Material Handling Products

Outside Diameter Reference Gauge System(Runout gauge)

This gauges measure runout and concentricity of inside and outside diameter. Just put a work piece on main rollers and read indication of dial gauge while turning handle.

Receiving Gauge / Jigs for Precision Measurement

We designs and produces small gaging tools, special gauges and multifunction gauges.

Uses: For testing the size and contour of a male pipe or sanitary fittings

Features: Flawless finish, Sturdiness, Non corrosive

COLLET CHUCK FOR ID CLAMPING

For work pieces which require clamping internal diameters (ID), We offer suitable solutions based on the application. Depending on geometry and size of the work piece, we provide many options such as a segmented collets, expanding bushings or centering discs. ID clamping systems are available mechanically or hydraulically actuated, or as a combination of both.
